

PhD position: Quantum phenomena in single molecules and nanographene

A PhD position is available in the Nanolino group. The topic is related to low temperature scanning tunneling microscopy and atomic force microscopy to probe quantum phenomena in single molecules and nanographene on metallic, insulating and superconductive surfaces.

If interested, please send your CV to ernst.meyer@unibas.ch

*Prof. Dr. Ernst Meyer, Departement of Physics, University of Basel Klingelbergstr. 82, CH-4056 Basel
